

# Creating Extraordinary Results through an Integrative Design Process

# IL Healthy & High Performing Schools Symposium

**US GBC IL / IL Green Governments Coordinating Council** 

# Creating Extraordinary Results through an Integrative Design Process

2 case studies – The Wolcott School and the Sarah E. Goode STEM Academy

- Deeta Bernstein, LEED AP BD+C, Sustainability Manager,
   Public Building Commission of Chicago
- Jennifer Costanzo, AIA, LEED AP BD+C, Principal, STR Partners, LLC
- Lawrence Kearns, AIA, Principal, Wheeler Kearns Architects
- Dr. Miriam Pike, Head of School, Wolcott School
- Sachin Anand, PE, LEED AP BD+C, Principal, dbHMS

Goode and Wolcott – Similarities and Differences

Integrative Design 18 April 2014

**Sarah E Goode STEM Academy** 

207,000sf on 17.1 acres 1,200 students New Construction

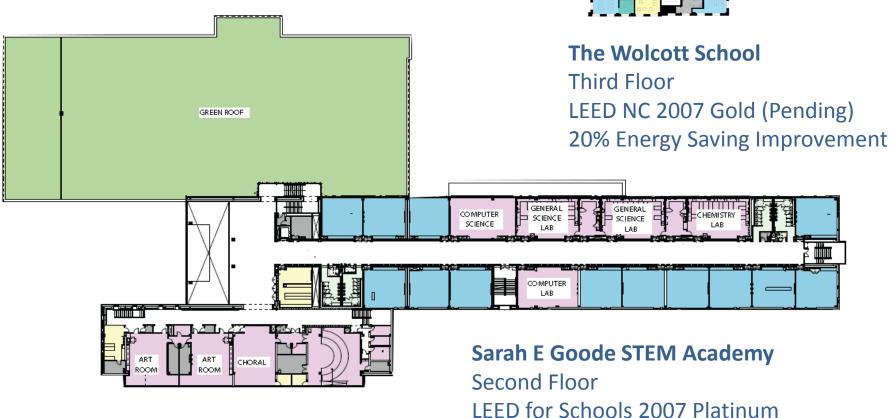

The Wolcott School
33,000sf on .35 acres
160 students
Adaptive Reuse

Integrative Design
18 April 2014

38.5% Energy Saving Improvement

Who Are You?

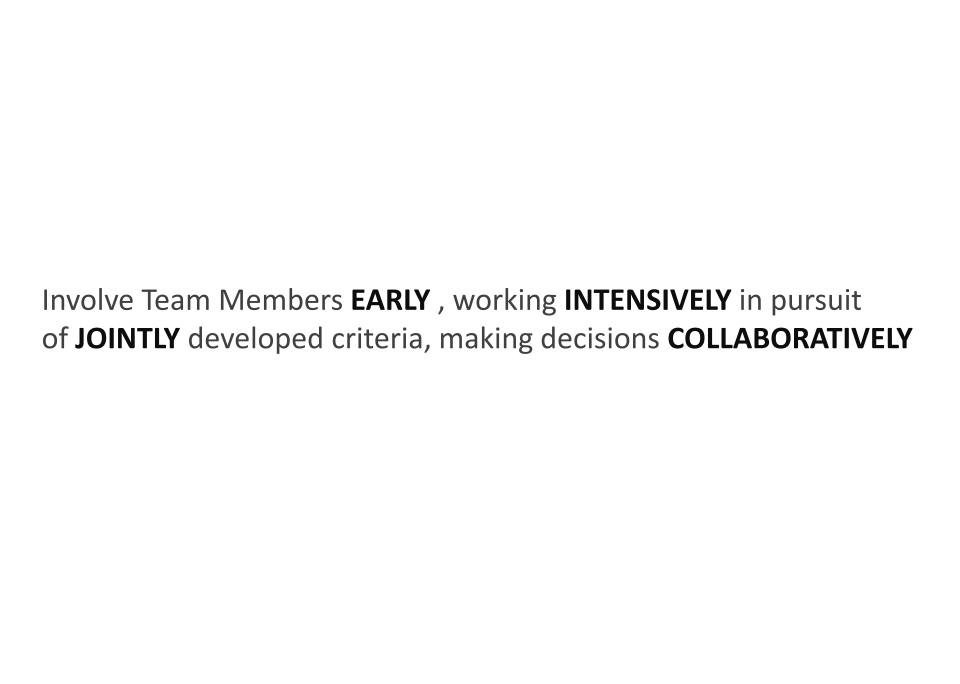

### **Objectives**

- Understand how the integrative design process works.
- Learn how such collaboration can be leveraged to create extraordinary results – whether to reduce first cost while improving ongoing efficiency or to create an "antithesis" school.
- Learn how excellent learning environments can be created in and beyond the classroom through this process.
- See how practical off-the-shelf parts can be put together for a whole that is truly greater than the sum of its parts

### A Word About Integrative Design...

Extraordinary projects can result from leveraging the cognitive diversity inherent in a project team. Each member can bring a different perspective and can possess different tools to solve difficult problems

- Partnerships Will you be pursuing partnerships with organic growers or farms? If so, will they be recognized?
- Partnerships Will the dining room host gallery space for local artists? Could the dining room host live music? Live dance? Is an impromptu dance floor desirable? Is there a story time for kids?

Posted at 10:52 AM in Conceptual | Permalink | Comments (2)

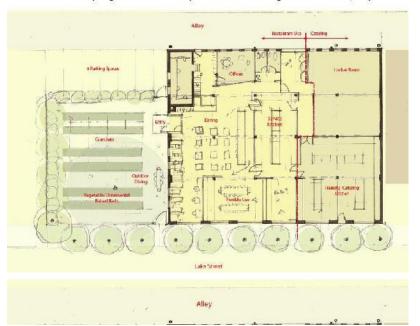

#### Materials

 Materials - Should the materials here be finished (polished metal, stone and wood) or more unfinished "raw" appearance seem better (exposed brick, concrete, timber)?

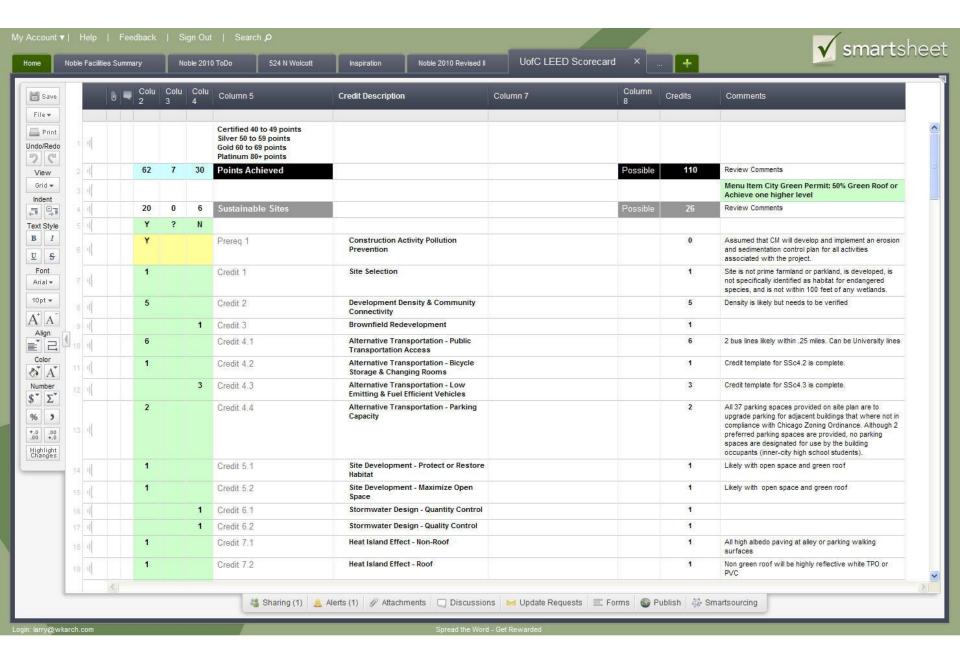

Posted at 10:52 AM in Conceptual | Permalink | Comments [2]

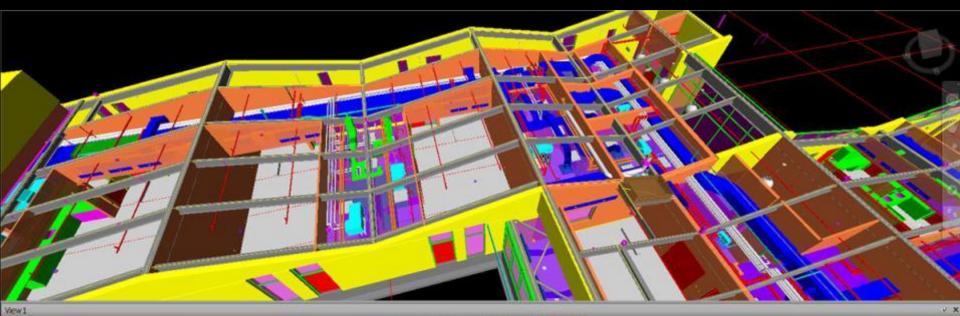

#### Schemes

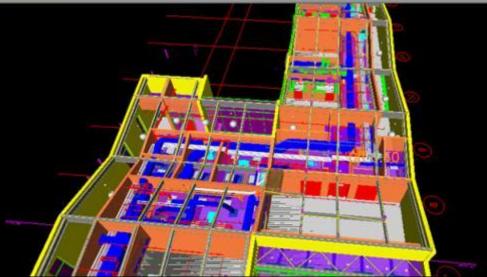

• Schemes - Do you gravitate toward any of the three Predesign schemes? If so, why?

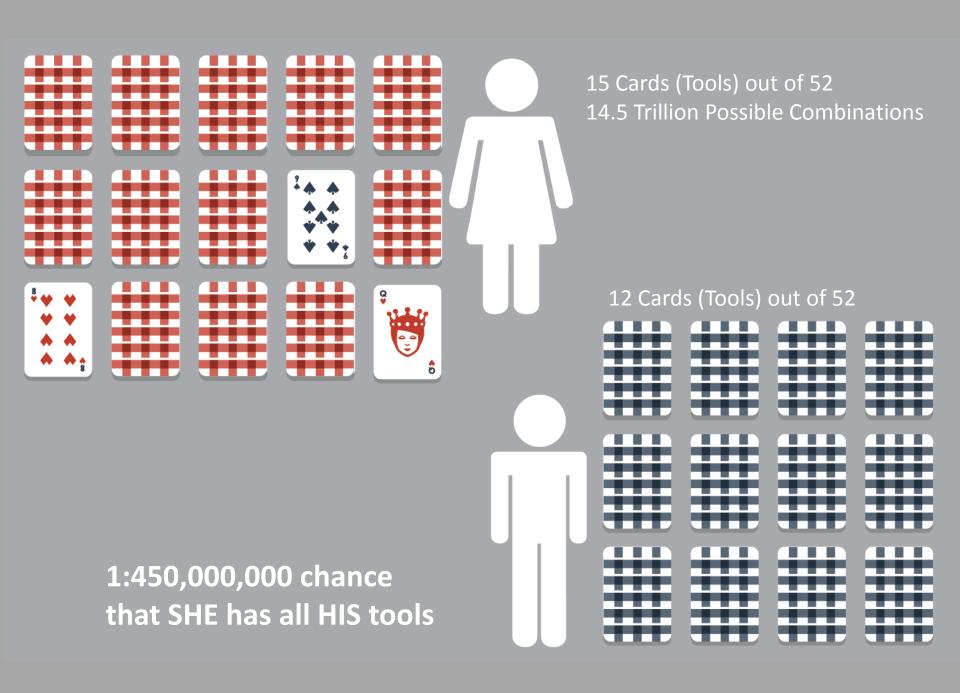

# Stepping Stones to Integrative Design – Shifting the Way We Think

Integrative Design
18 April 2014

### MENTAL MODEL

client, design and building team mindset, attitude and will

#### **PROCESS**

integrated, all parties engaged—
system optimization through iterative analysis

#### **TOOLS**

metrics, benchmarks, modeling programs, analytical methods for materials and costing

#### PRODUCTS/TECHNOLOGIES

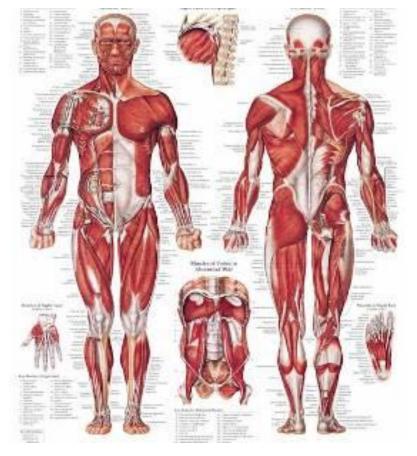

things and stuff technologies and techniques

Concept by Bill Reed and Barbra Batshalom

# Integrative Design 18 April 2014

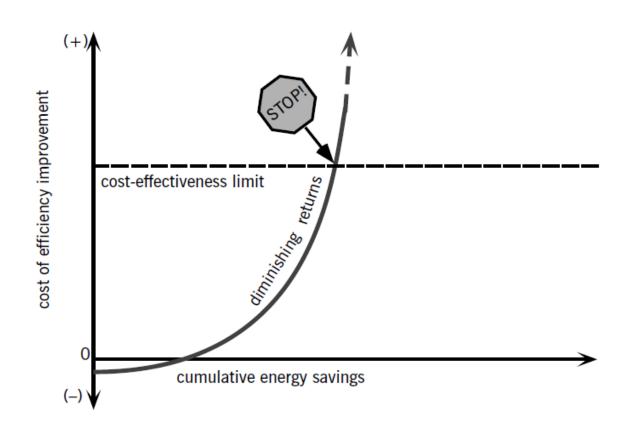

### Building as an Organism

- Systems are related, integrated
- Parts not independent
- Holistic, non-linear
- Analyze to streamline

### **Diminishing Returns**

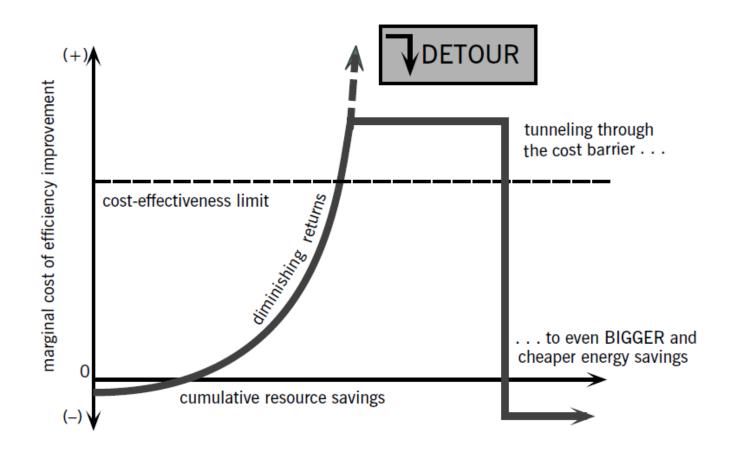

Integrative Design 18 April 2014

From Natural Capitalism by Lovins, Lovins and Hawken, 1999, Chapter 6

# Integrative Design 18 April 2014

# Tunneling Through the Cost Barrier

# Integrative Design 18 April 2014

# Sarah E. Goode STEM Academy

### Context

Integrative Design
18 April 2014

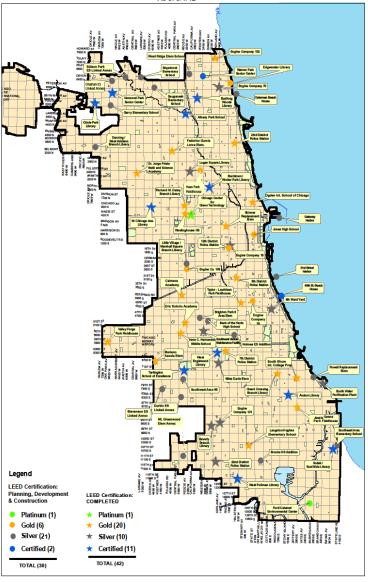

- Public Building Commission of Chicago
- Chicago Public Schools
- City of Chicago
  - ✓ Aligned Goals
  - ✓ Shared Commitment
  - ✓ Sustainable Chicago 2015

#### Sustainable Capital Projects Public Building Commission of Chicago

Completed and Under Development As of 5/1/12

# Integrative Design 18 April 2014

### **Aligned Goals**

- Program-wide: Make "green" routine
- Excellent student experience / learning environment
- Use LEED to help meet goals

Common Understanding Shared Commitment Desired Outcome

### Context

Integrative Design
18 April 2014

### City of Chicago Sustainability Goals From Green Medians to Sustainable Chicago 2015

### Context - The Evolving Prototype

- Urban Model High School Chicago Public Schools
- Minimum LEED Silver certification
- Design Standards Constraints

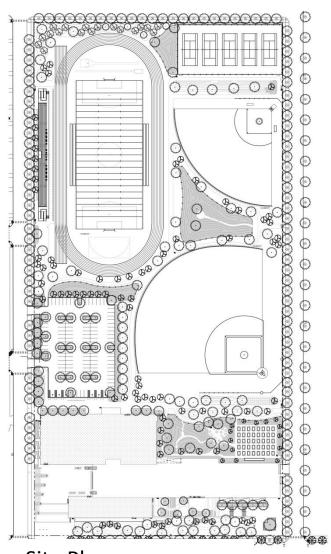

### **Prototype Layout**

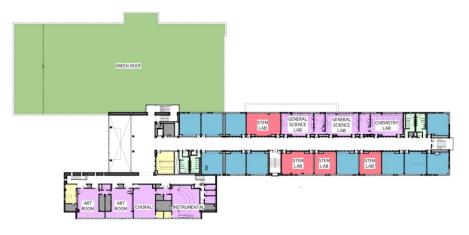

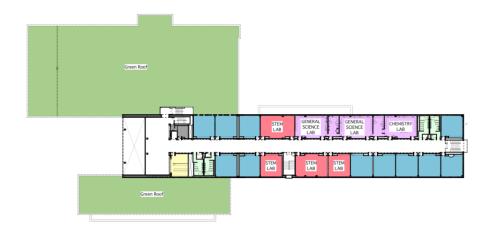

Site Plan

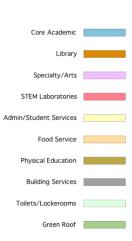

### **Prototype Layout**

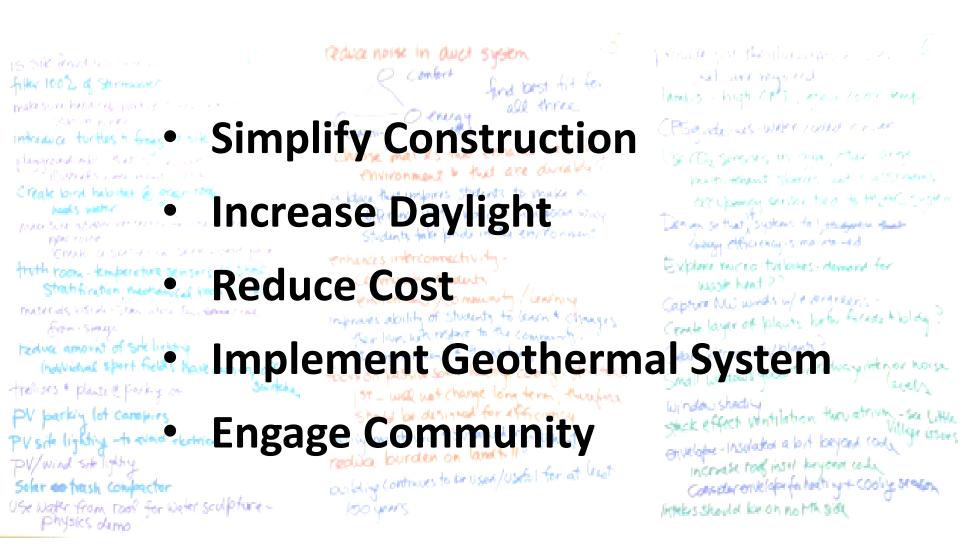

Second Floor Plan

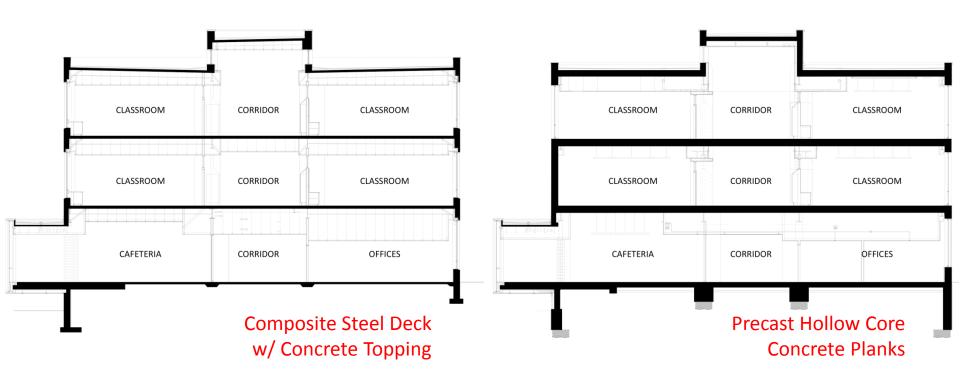

Third Floor Plan

## Good(e) Charrette Goals:

Sarah E. Goode Building Section

**Prototype Building Section** 

### Structural System

OPTION 2: INTERIOR VIEW IN TYPICAL CLASSROOM

41% Glazing Area

OPTION 1: INTERIOR VIEW IN TYPICAL CLASSROOM

BASE CONCEPT DESIGN:
INTERIOR VIEW IN TYPICAL CLASSROOM 28% Glazing Area

### **Study: Glazing Properties**

Simulation Option	Glazing Area (% of Total Wall Area)	Electrical Energy		Gas Energy		Total Energy	
		Usage (kWh)	Cost (\$)	Usage (Therms)	Cost (\$)	Usage (10 <sup>6</sup> Btu)	Cost (\$)
Option 1 <sup>a</sup>	28%	941,500	30,214	62.04	1,220	3,833	31,434
Option 2 <sup>a</sup>	41%	918,377	29,471	72.86	1,433	3,862	30,904
Option 2 <sup>b</sup> - Scenario 1	41%	946,073	30,360	68.71	1,352	3,915	31,711
Option 2 <sup>b</sup> - Scenario 2	41%	944,431	30,307	69.06	1,358	3,913	31,666
Option 2º - Scenario 3	41%	934,379	29,985	67.10	1,320	3,859	31,305

### **Prototype**

Sarah E. Goode

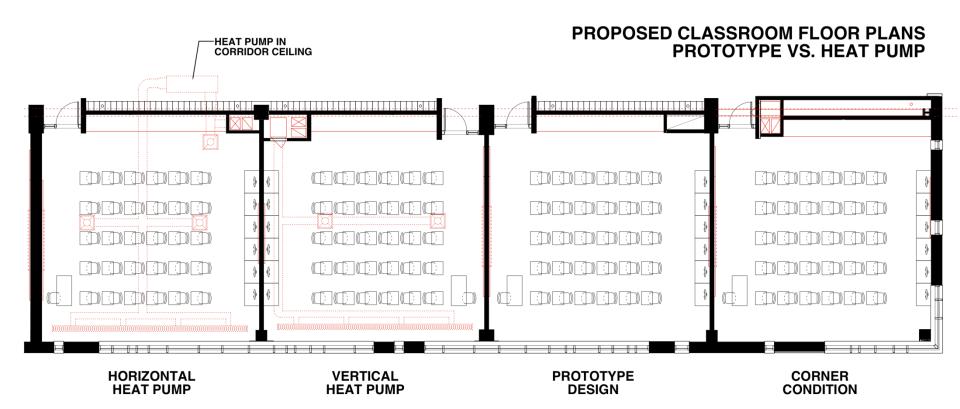

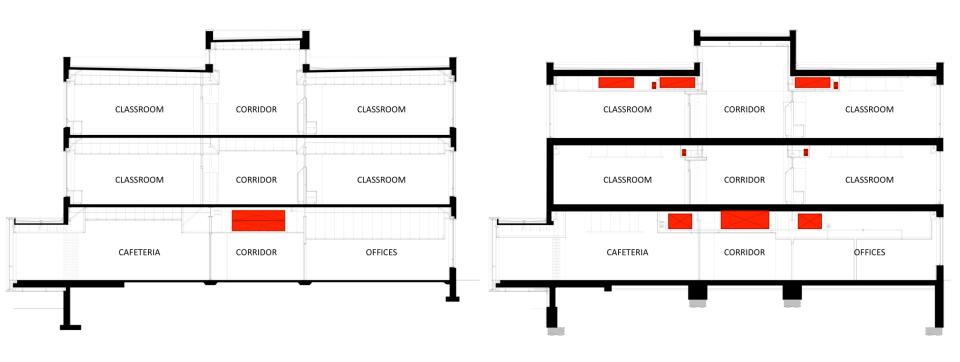

### **System Life-Cycle Cost Analysis**

### Areas of Intense Mechanical Coordination

# LEED Results - Sarah E. Goode STEM Academy vs. BOTYHS

	Goode	BOTYHS
Sustainable Sites	14	10
Water Efficiency	5	5
Energy and Atmosphere	12	8
Materials and Resources	7	7
Indoor Environmental Quality	16	10
Innovation	5	5
TOTAL	59	45
	Platimum	Gold

# Sarah E. Goode vs. Evolving Prototype A Side-By-Side Comparison

Goode	\$	62,452,000		
BOTY	\$	63,822,440		
	\$	(1,370,440)	@ \$7/SF difference	
Significant Scope Differences:				
	Brick pattern regularized; Less quantity than prototype due to increase in windows and shorter building due to HVAC changes.			
Steel /	Goode changed from concrete deck to steel deck with concrete top. Shorter building due to smaller HVAC ductwork. Eliminated Penthouse. BOTY stayed with precast plank. Penthouse required with standard HVAC			
Spray Fireproofing and Insulation	Less Steel; less fireproofing.			
HVAC	Smaller ductwork – VAV versus distributed heat pumps with dedicated outside air; Added acoustic insulation at classroom heat pump closets; Boilers reduced from (3) 3,000 mbh to (2) 1,500 mbh;  (1) 450 ton Chiller versus distributed heat pumps and geothermal pool dehumidification unit.			
Geothermal wells	Added geothermal wells – 170 wells at 450 feet deep each.
